

Oil & Gas

You can try out ARTIS V2.9 with any recent Chrome, Edge, Firefox, Opera or Safari web browser by clicking on the image below; this will open the demonstration model on a new page in your browser. You can start the trial from there. ARTIS does not use any plug-ins or add-ons, but you will need to use a recent browser version, with JavaScript enabled.

After opening the demonstration model, the quick route to do a run with zero clicks is:

1. hit Tab or hover the mouse to bring the availability diagram into focus
2. hit Ctrl+A to select all items (you'll see the border around the availability diagram turn light blue)
3. hit Ctrl+R to show the run form (ARTIS will move the focus to the 'OK' button)
4. hit Enter (ARTIS will move the focus to the 'Submit' button)
5. hit Enter and wait (any user interaction on the page will cancel the run)
6. when the download of the 'results.zip' file has completed, extract it
7. in the file browser, select the 'results.html' file and hit Enter to open the results with your web browser
