

Configuration

The configuration form provides the input fields for the language, the capacity unit and the URL of the ARTIS server.

The screenshot shows a configuration form with the following fields:

- theme: light (dropdown menu)
- language: English (dropdown menu)
- capacity unit: M (dropdown menu) W (text input)
- ARTIS hostname: www.artis.la (text input)

In the above example

- the theme is light
- the language is English
- the model's capacity unit is megawatt (MW)
- the host name is that of the public ARTIS server.

The user interface can be presented in light and dark themes.

The selection of languages is Dutch, and English. The translations are invertible, so they do not lose any information.

All items have the same capacity unit. The capacity unit may include any of the 20 [SI prefixes](#).
