

Map

From the user interface on the ARTIS server *.artis.la, the network-draw operation (Ctrl + G) shows the network on an OpenLayers map.

On the map, a node is shown as a square, with size proportional to the node's depth, centred at its geo-coordinates, and with its colour.

An edge has the colour of its node with the largest depth. The direction of the edge is not shown.

A buffer is shown as a circle, centred at the middle of its edge.
